DEEPAK KUMAR

+91 6264233353 | deepakmaliya6264@gmail.com | LinkedIn | GitHub

PROFILE

B.Tech (Data Science) student with hands-on full-stack development experience, including building React frontends, FastAPI backends, and end-to-end web applications. Proficient in C++, Python, JavaScript, and Object-Oriented Programming, with working knowledge of MySQL and version control using Git/GitHub. Strong problem-solving and analytical skills, with additional hands-on exposure to AI/ML tools such as LLMs and Machine Learning through personal projects.

PROJECTS

AI Document Analyzer | *LLM*, *RAG*, *Python*, *FastAPI*, *React*, *JavaScript* | GitHub Link

- Built an AI-powered document analysis system using LLMs integrated with a Retrieval-Augmented Generation (RAG) pipeline for context-aware text understanding, delivering answers in ~3.2 seconds per query on average.
- Built a FastAPI backend to serve the RAG pipeline and a React frontend with JavaScript for document upload and an interactive chat interface, enabling seamless user interaction with the AI backend.
- Implemented vector embeddings and semantic search to retrieve relevant document chunks, reducing hallucinations and improving response accuracy.
- Managed source code and iterative feature development using Git and GitHub, maintaining a clean commit history throughout the project lifecycle.

Customer Churn Prediction | *Machine Learning*, *Python*, *Scikit-learn*, *FastAPI*, *MySQL* | GitHub Link

- Built a machine learning classification model using Scikit-learn to predict customer churn with Random Forest and Logistic Regression algorithms.
- Designed and queried a MySQL database to load and store customer data, and performed exploratory data analysis using Matplotlib and feature engineering using Pandas and NumPy to identify key churn indicators.
- Deployed the trained model as a FastAPI service to enable real-time churn prediction, achieving ~80% predictive accuracy and enabling data-driven retention strategies.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix, and version-controlled the codebase using Git and GitHub.

SKILLS

Programming: C++, Python, JavaScript, Object-Oriented Programming (OOP)

Web & Frameworks: React, FastAPI

Databases: MySQL

Version Control: Git, GitHub

AI/ML (Additional Skills): Machine Learning, LLM, RAG, NumPy, Pandas, Scikit-learn, Matplotlib

EDUCATION

Bachelor of Technology (B.Tech) in Data Science

RGPV University, Bhopal | Bansal Institute of Research & Technology, Bhopal

2023 – 2027 | Currently in 4th Year

CERTIFICATIONS

- GenAI Powered Data Analytics — Forage
- Data Analytics Training & Certification — Unified Mentor Pvt. Ltd. (3 Months) — Training in data cleaning, EDA, Python, MySQL, Excel, and Power BI.
